

Product Brochure

Following big investments into new machinery and additions to our workforce, Alway are pleased to announce that from September 2021 we will be launching our new product range.

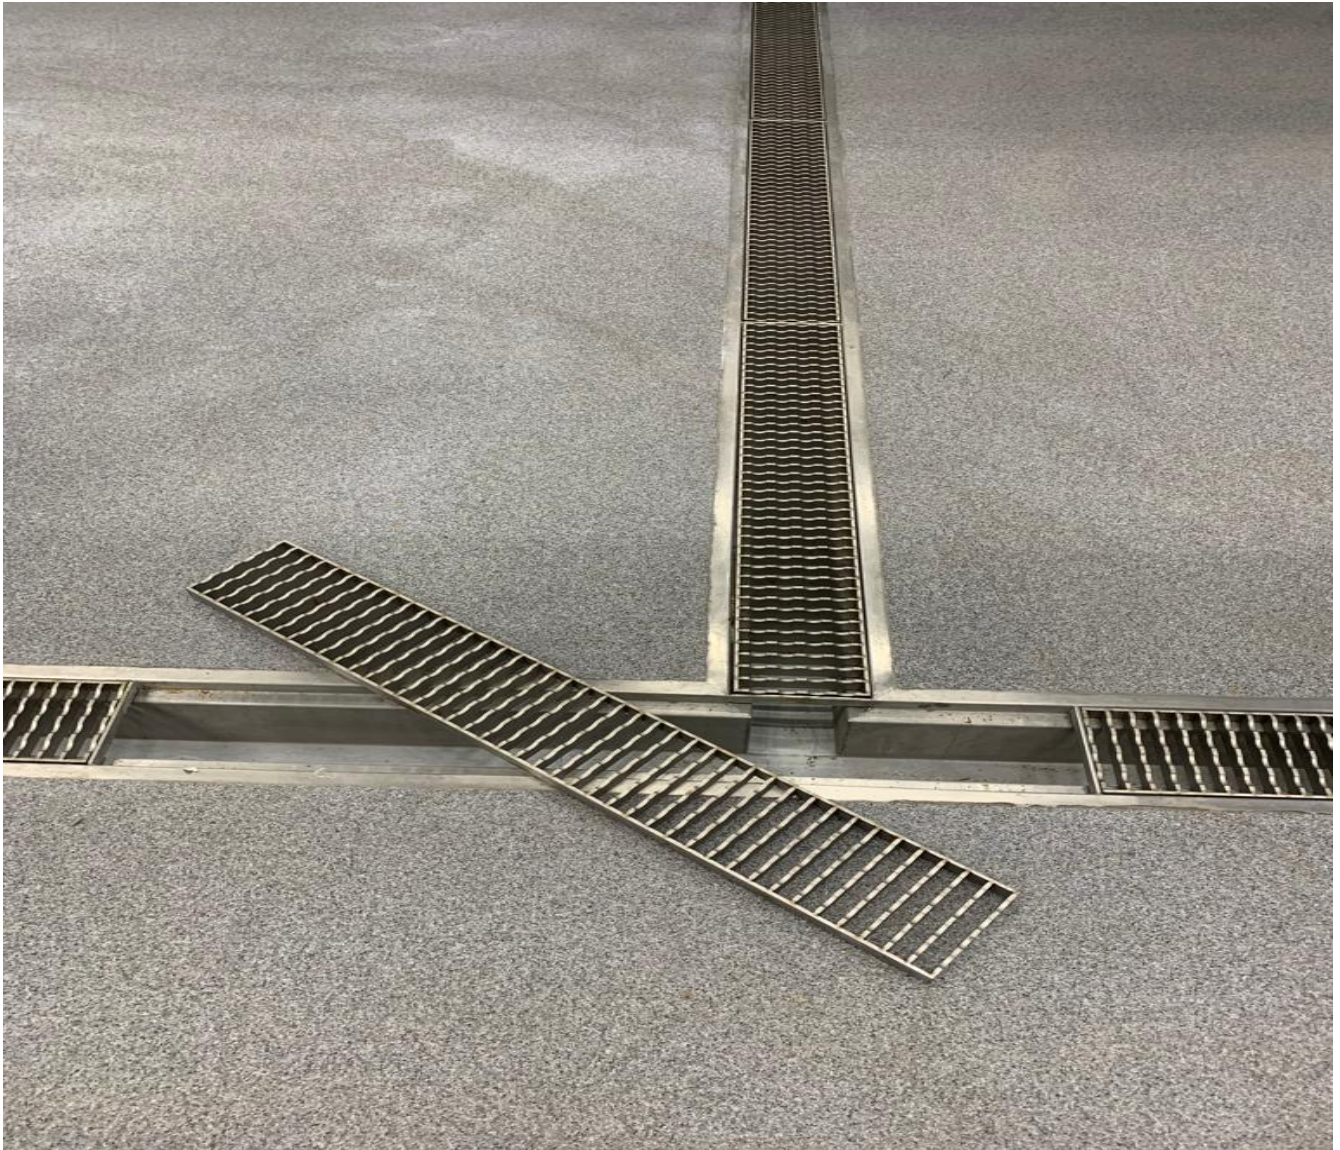

The Alway Aqua range will offer a comprehensive series of stainless-steel products to suit all applications in busy environments where hygiene is critical. The range includes drainage channels, gratings, gullies, wall support systems and protection products.

Our Aqua Drainage range is manufactured from stainless steel grades 304 or 316 and is specifically designed to withstand the rigors and demands of today's heavy industrial processes and conform to the ever-increasing standards of hygiene. All drains are fully welded allowing for greater flexibility in design. Drainage can be installed into all floors including resin finish, sheet vinyl and concrete. For applications that requiring products to be manufactured in specific sizes, and other grades of steel, we can offer a total customer solution which includes design, manufacture and installation.

All stainless-steel drains are supplied with drainage covers, all of which can be manufactured for customer and industry specific requirements and can be customised to suit all applications, addressing various issues such as anti-slip, ease of cleaning, load capacity and drainage appearance.

Product Brochure

Our Hygienic wall support system (HYPASS) is designed to support the hygienic wall panels above the floor level or clip on to the side to reduce the ingress of liquids and offers protection from factory traffic, available in both standard and custom-built profiles. Our stainless-steel kerbing is manufactured in various gauges from 1.5mm up to 10mm in 304 or 316 grade stainless steel, The fully welded HYPASS system ensures a cavity free surface which eliminates the potential growth of bacteria, providing a subsequently cleaner and safer food production environment.

Product Brochure

Our Protection 3000 range is the ideal product for all areas where a high level of Impact Protection is required, manufactured in a range of designs and sizes they provide a modern and hygienic solution for all environments.

Rails are purpose made to suit specific requirements and can be surface mounted, wall mounted or cored drilled into the floor which eliminates exposed fixings.
